

Angle grinder AGE125

Blade diameter of 125 mm

Universal angle grinder
Ø 125 mm for processing
construction materials and
metal

Extremely durable and
efficient motor for high
performance

Electronics with soft
start, restart and
overload protection

The compact AGE125 angle grinder is useful for a wide range of applications and is a must-have for any craftsman, with its durable motor, high level of efficiency, and electronics with features such as a soft start, restart and overload protection. The anti-kickback feature

turns off the motor on the disc being blocked, ensuring safe operation. Effective cooling and extensive dust seal increase the lifetime of the angle grinder. In addition, the blade guard is tool-free adjustable and the slide switch is lockable.

System & accessories
