

# Digital Asset Management

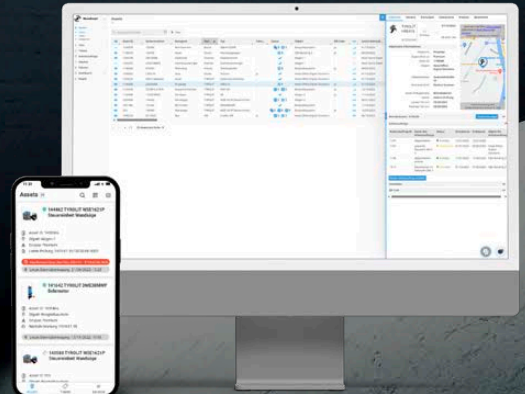

Tyrolit's innovative asset management platform MoveSmart and the respective hardware offer real-time operating and user data for assets and machinery. Thus, MoveSmart makes a significant contribution to increasing efficiency in companies.

In conjunction with the respective MoveSmart hardware and equipment tracking, you get an overview of where and when your equipment is currently being used. At the same time, MoveSmart provides up-to-date test and safety statuses and, thus, enables maintenance planning in advance.

This not only avoids asset failures and idle times, but also increases occupational safety. With MoveSmart, construction sites, maintenance and repairs can be conveniently planned via the web version or via mobile phone app.

Independent from machine manufacturers

Machine availability

**Always know which machines are available.**

We ensure operational readiness through inventory overview and simple, digital damage reports.

Documents at your fingertips

**All relevant documents at your fingertips.**

With MoveSmart, you avoid unnecessary paperwork and have all documents linked with the respective assets.

Locations at a glance

**Locations of the equipment at a glance at any time.**

Thanks to our state-of-the-art hardware, MoveSmart enables you to locate and track your assets and machinery at any time.

Documentation of machine usage

**Operational machine usage always documented.**

With the right hardware, MoveSmart enables runtime documentation and offers traceability of operations.

Project planning

**Plan your projects and orders quickly, easily and directly with your assets.**

This allows you to avoid idle times and unnecessary driving time.

# Maximum flexibility and compatibility for your business

In order to guarantee maximum flexibility and compatibility, we offer you three different packages. Each package offers you a suitable solution to tackle your asset management:

★ BASIC	★★ STANDARD	★★★ PREMIUM
<b>Asset management</b> <ul style="list-style-type: none"><li>+ Detailed overview of all assets</li><li>+ Maintenance workflows</li><li>+ Document management</li><li>+ Malfunction &amp; damage report</li><li>+ Cost monitoring</li></ul>	<b>Tracking &amp; Digital Forms</b> <ul style="list-style-type: none"><li>+ Basic services</li><li>+ Localisation of all connected assets and vehicles</li><li>+ Digital forms &amp; workflows</li><li>+ Exam handling</li><li>+ Overview of the actual use of assets</li></ul>	<b>Planning &amp; Order processing</b> <ul style="list-style-type: none"><li>+ Basic and standard services</li><li>+ Project and deployment planning</li><li>+ Overview of all existing projects and assignments</li><li>+ Logbook</li><li>+ Quantity item management</li></ul>

## MoveSmart Hardware

With the appropriate hardware, both assets of Tyrolit as well as assets of other manufacturers can be integrated into MoveSmart. Depending on the software package and applications, we offer the appropriate hardware: From adhesive QR codes, which can be used to identify the equipment, to trackers that transfer machine data and are able to read out locations.

The wall saw WSE1621 is already equipped with the matching hardware and can be integrated at any time.

## On request, we also offer the following services:

- + On-site analysis
- + Data integration
- + Attaching hardware to equipment
- + Additional trainings
- + Implementation of customer-specific user requirements
- + Creation of customer-specific reports
- + API-integration
