

CSS ROLL STAR 2.0

Grinding Wheels for Roll Grinding

CSS ROLL STAR 2.0

With the CSS Roll Star 2.0, TYROLIT is defining a new level of performance in the grinding of rolls. More than one hundred years of experience in the development of grinding solutions of the highest quality make TYROLIT a valued partner for roll grinding. Thanks to our market-leading know-how in bonding technologies and high quality sintered aluminium oxides the best possible results are achieved in the CSS Roll Star 2.0 product line.

Application:Repair grinding rolls

- Optimisation of grinding costs: New sintered aluminium oxide enables shortest grinding times and high tool life
- Bonding system: Maximum grain utilisation through optimised bonding systems and abrasive additives enable a good grinding behaviour

- Universal use:
 Suitable for all common roll materials
- Customer solutions: Thanks to our many years of experience we offer the best technical support

Assortment

Shape 1 Straight grinding wheel

Shape 5 Grinding wheel recessed one side

Shape 7 Grinding wheel recessed two sides

Diameter: 600 – 1100mm **Thickness:** 60 – 152mm

Bore: 127 – 508mm **Grit size:** 24 – 120 mesh

The grinding of an HSS-work roll in a hot rolling mill brought the following results while maintaining the quality of the roll.

Increase of performance by 20%

CSS RS 2.0 120%
CSS RS 100%

Increase of the removal rate by 10%
